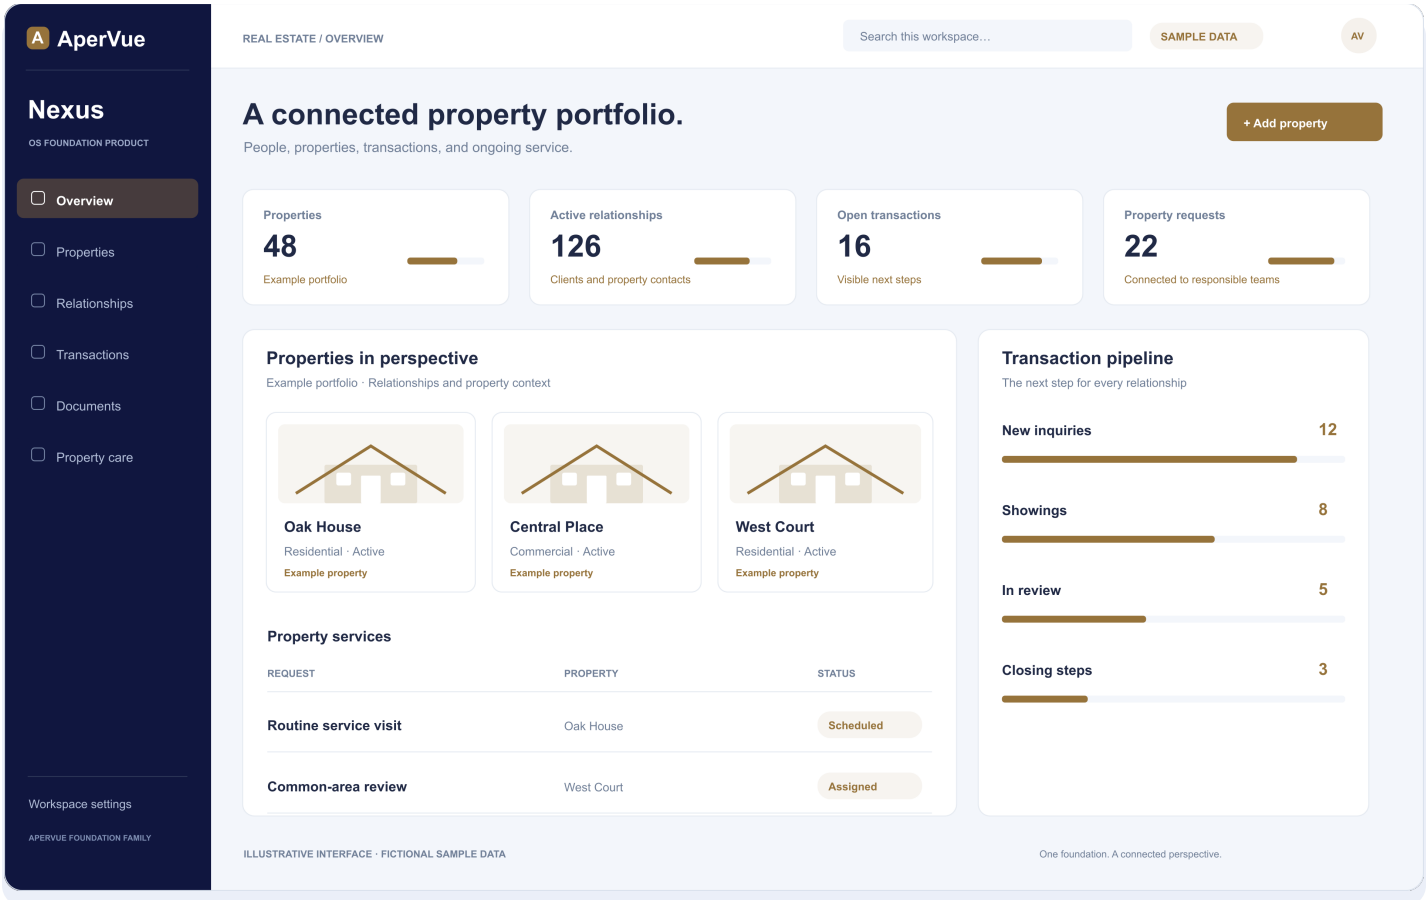
OS FOUNDATION PRODUCT / REAL ESTATE

Nexus

People and properties.
One connected perspective.

Your portfolio, in perspective.

Nexus is the OS foundation for real estate, connecting properties, client relationships, transactions, service requests, and portfolio operations. Bring property context, transaction stages, and maintenance priorities into one operating view.



Illustrative interface. Fictional sample data.

Screens and workflows are shaped around your organization.

CONNECTED CAPABILITIES

Keep the next step connected.

01 ## Properties & listings

Connect property records and listings around the places your organization manages or represents.

02 ## Client relationships

Bring contacts and client context together with the properties, opportunities, and services behind each relationship.

03 ## Opportunities & showings

Organize opportunities, showings, and team responsibilities as client interest develops into a transaction.

04 ## Transaction coordination

Connect transaction stages, document steps, and handoffs so teams can follow the work through the process.

05 ## Maintenance & vendors

Bring maintenance requests, vendor coordination, and property-related work into a shared operating flow.

06 ## Portfolio visibility

See property context, transaction activity, and maintenance priorities together across the portfolio.

WHO IT'S FOR

Built for the people behind every property.

For real-estate businesses and property teams coordinating relationships, listings, transactions, and ongoing property services. Designed for client-facing teams, transaction coordinators, portfolio managers, and property service teams.

Let's talk about Nexus.
